

POWERFUL DRIVE TEST TOOL FOR MEASURING AND MONITORING WIRELESS NETWORKS

NEMO OUTDOOR

Nemo Outdoor has an established position both as a pioneer and leader in drive test measurement solutions. Nemo Outdoor comes with an incomparable support for over 270 test terminals and scanning receivers, offering a broad range of testing options and support for all the newest technologies at any given time.

Nemo Outdoor forms a centralized solution for extensive network measurement, troubleshooting and optimization. Its cost-effectiveness is materialized in its single platform and modularity which enables the user to tailor the product according to their particular needs.

COMPREHENSIVE SOLUTION BASED ON A SINGLE LAPTOP

Nemo Outdoor is highly suitable for targeted network problems, and simultaneously poses the possibility to be expanded to cover extensive and powerful measurements from drive testing to benchmarking and QoS measurements, developing with the market to cover all the established and emerging phases of the network life cycle. All of this is possible on a single laptop-based software platform.

Reduce the time-to-market of new services

In addition to drive test and benchmarking measurements, the Nemo Outdoor platform is expandable to support voice and video quality measurements. Nemo Outdoor also offers tools for various troubleshooting tasks. With a test terminal and/or a scanner you can perform real-time missing neighbor detection, pilot pollution analysis, and GSM interference analysis.

To gain competitive advantage in today's market, monitoring and improving customer experience is crucial. Nemo Outdoor enables the measuring of quality-of-experience (QoE) metrics for the services and applications your customers are actually using, including advanced YouTube video testing, Facebook application testing, and Skype call measurements. The information provided by Nemo Outdoor assists in the verification and troubleshooting of new services reducing the time-to-market.

Nemo Outdoor's diversity is only matched with its flexible user interface and ease of use. Owing to its single platform, all essential functionalities can be found in one location. Through the fully customizable user interface the user is able to tailor Nemo Outdoor for their particular use.

The patented multi-data functionality empowers users to connect up to six terminals to one laptop with the [Nemo Walker](#) and [Nemo Multi Lite](#) options.

Highlights

- Extremely easy to set up, configure and use. The time from receiving the product to using it ranges from a couple of minutes to less than two hours.
- Automated measurements with extensive scripts and large-scale measurement lists enable you to focus on the actual task at hand during drive testing.
- Quality-of-experience (QoE) metrics for the services and applications your customers are actually using.
- User-defined parameters from signaling messages can be searched and displayed in info view and graph side panel during measurement and playback.
- Open ASCII file format – Nemo Outdoor uses an open file format which can be directly utilized in various third-party analysis tools; no conversion or parsing needed.
- Patented multi-data.
