

# TESTING PUMPS

The Ega Master's Testing Pumps have an **exclusive and innovative valve system**, which increases its **stiffness and stability**, as well as the **comfort and efficiency of the user**, since it allows its complete use by applying only one hand.

There are 3 types of pumps, **horizontal, vertical and stainless steel**.

**Maximum stability!**

\*G12: 12 MONTHS OF WARRANTY

**1. Indispensable to verify the sealing in plumbing, heating, solar panels, fire-prevention equipments, in refrigeration systems, gas-oil installations, in boilers' and pressure container's building.**

**2. Quick pressure adjustment system by a single valve.**

**3. Hermeticity and pressure test with water or oil.**

**4. Easy reading pressure gauge.**

**5. Metallic construction, robust for the heavy plumbing work. Tank made in steel (or stainless steel), corrosion resistant, epoxy-powder coated up to 12 litres capacity.**

## INSTRUCTIONS FOR USE

1-Fill up the tank

2-Connect the circuit

3- Pump until reaching the pressure

4-Wait the testing time
