# Launch X-431 PRO S

X-431 PRO S is based on an Android system, it is a new car malfunction diagnostic device developed by Launch Tech. X-431 PRO S completely substitutes X-431 IV and X-431 Diagon III.

It inherits the Launch advantages in car fault diagnostic technology, such as multi manufacturer coverage, powerful test abilities, special functions and accurate test data. X-431 PRO S achieves the full car model and full fault system diagnosis through Bluetooth communication between the DBSCar connector and an intelligent mobile terminal.

X-431 PRO S, takes the advantage of mobile internet and can share maintenance data and case library, provide instant maintenance information, and build public and private maintenance social circles, thus leading to a wide car diagnostic community.

## Product Features:
