

Sanifloor

Concentrated multi-purpose sanitizing detergent

Cleaning &
Maintenance

Sanifloor

Concentrated sanitizing detergent to clean floors and hard surfaces. Formulation based on benzalkonium chloride (active ingredient classified as biocide by ECHA - European Chemicals Agency) and hydrogen peroxide, it can act quickly and effectively against germs and bacteria removing dirt and grease.

It can be used to clean ceramic, marble, resilient floors such as PVC, LVT and rubber, laminate and wood, terracotta and stoneware floors. Sanifloor can be used for the daily cleaning of the most delicate surfaces, dries quickly, it is streak-free, does not require rinsing and leaves a delicate scent. It is effective against germs, bacteria (Gram+ and Gram-), fungi, algae and spores. It is suitable for pet space.

Sanifloor complies with the cleaning protocol aimed at decontamination, according to the recommendations of the WHO (World Health Organisation) and indicated in the Italian Ministry of Health's Official Document 5443 of 22/02/2020, when used in combination with the Reset 4.2 decontaminant solution based on sodium hypochlorite.

Technical data – 20 °C, 60% R.H.

Appearance	Green liquid
Density	1.00 kg/litre
pH	5
Recommended amount of use	120 ml in 5 litres of water (2.3%)
Storage	24 months in original sealed packaging – Frost sensitive
Packaging	1 litre bottles, 5 litre plastic cans

Instructions for use

Before washing the surface, remove dust and impurities. Shake before using. Pour 2 caps of detergent into 5 litres of water. Wash with a well-wrung cloth or a mop. No need to rinse. Alternatively, it can be used on floors with the Cinderella spray-mop, by diluting half a cap in a water tank. It can also be applied with floor washing machines.

On the most delicate surfaces it is advisable to do a preliminary test. Do not use on wax finished surfaces.

Ingredients

The ingredient list complies with the EC 648/2004 Regulation of Detergents – Less than 5%: Non-ionic surfactants, Cationic surfactants (benzalkonium chloride), Oxygen-based bleaching agents, EDTA, Perfume.

Biodegradable according to the law

Disposal

Dispose of the unused product and empty packaging in accordance with the provisions of the local legislation in force.
