**Ignition trigger can be wired to the ignition of the vehicle (or other 12v ignition source) to provide a timed disconnect to the connected peripherals after vehicle has been turned off. When vehicle ignition is off, RAM® Tough-Hub™ continues to provide power to the connected peripherals for a pre set duration of time. The default delay is pre set from the factory to 15 minutes.**
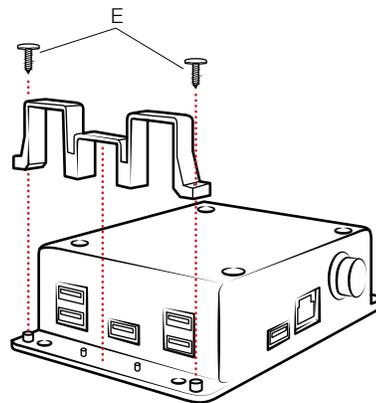

❶ To change default pre settings, remove housing and switch the small jumper component from "POS 2" to any of the other 3 positions.

A

x 5 USB Ports

**- Additional USB Port
- RJ 45 Ethernet Port
- 12-48 Volt DC Input**

**- Ignition Trigger
- USB Output Port**

POS 0 - Constantly ON
