

Part Index

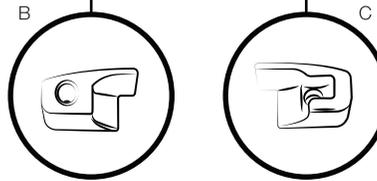

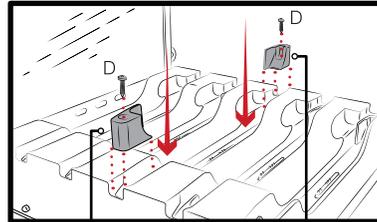

*not to scale

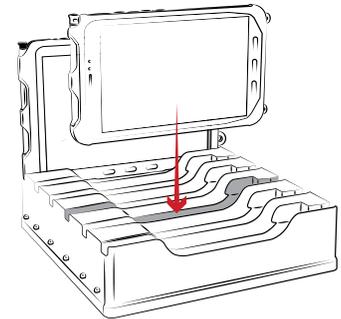

- 1** Simply insert your device into any of the six slots provided.

- 2** For charging Tab Active2 devices, you will need to insert spacers into each corner of the desired docking port. Insert the right side spacer (B) into the right side of the docking port, and the left side spacer (C) into the left side of the port. Secure each spacer by inserting the provided screws (D).

- To revert the port back to its original size simply remove the two spacers.
