ArmaFlex[®] Duct Alu

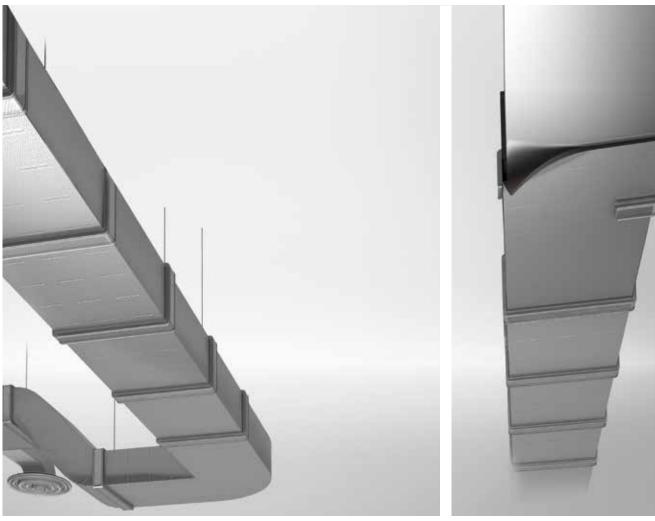

DUST & FIBRE FREE ARMAFLEX INSULATION FOR DURABLE PROTECTION OF AIR DUCTS

- Prevents condensation and heat losses on cold and warm air supply ducts
- Available with alu-foil covering for a smooth and easy to clean aesthetic finish
- 1.5m wide sheet available to match ductwork panels
- Flexible material, easy to cut and install with no PPE required
- Closed cell structure for water vapour transmission resistance

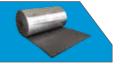

RANGE

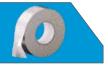

SHEET

Pre-covered endless sheet (rolls), pre-covered endless self-adhesive sheet (rolls)

TAPE

Self-adhesive tape

RECOMMENDED PRODUCTS

rmaFlex RS850 adhesive

Closed cell insulation material with a bright silver covering, specifically designed and produced for the thermal and acoustic insulation of air-conditioning ducts. ArmaFlex Duct insulation reduces heat loss and the closed cell structure prevents water vapour transmission, thus avoiding the risk of corrosion.

Material type	Elastomeric foam based synthetic rubber. Factory made flexible elastomeric foam (FEF) according to EN 14304
Colour	Black with silver foil covering
Material special information	Self-adhesive coating: pressure-sensitive adhesive coating on modified acrylate basis with mesh structure and covered with polyethylene foil.
Applications	Insulation of rectangular and cylindrical air ducts
Remarks	Declaration Of Performance (DOP) is available in accordance with Article 7(3) of regulation (EU) No 305/2011

ArmaFlex[®] 520

TRIED & TESTED FOR SUPERIOR ARMAFLEX RELIABILITY

- Fast drying contact adhesive
- Specially formulated for Armaflex® insulation
- Ensures reliable vapour-tight seal
- For operating temperatures up to +105 °C
- One-component industrial adhesive
- Low viscosity, air drying adhesive

Specially formulated adhe	sive for insulating Armaflex insulatiuon.
Material type	Contact adhesive on polychloroprene basis, free of aromatic components.
Colour	Beige
Material special info	Liquid
Applications	Gluing of all flexible ArmaFlex insulation materials (except HT/ArmaFlex & ArmaFlex Ultima).
Special features	Specially formulated adhesive for uniform and safe seam bonding of ArmaFlex insulation materials.
Assembly	Application temperature: ideally +20°C, not below 0°C. At temperatures below +5°C or high humidity approx above 80%), increased condensation may form on the surfaces to be glued or adhesive films. In these cases bonding is poor or impossible. This can be tested by using absorbent paper (blotting or crepe paper). Work should not be carried out on operating plant or areas exposed to strong sunlight. Shake and stir well before use. Apply thinly to the areas to be bonded with a brush or spatula. For contact adhesion press together with force during the contact adhesion time. Detailed application guidance is available.
Remarks	The adhesive achieves its final strength after 36 hours. Only then should plant be put into operation. Never insulate plant which is in operation or work in strong sunlight. Wait 36 hours before applying coatings (exception: ArmaFinish 99), adhesive tape, coverings etc.

Temperature Range		
Max service temperature	+105°C	
Min service temperature	-50°C (for temperatures below -50 °C please contact our technical department)	
Performance		
Coverage (guidance only)	Minimum consumption with the adhesive applied to both surfaces: ArmaFlex tubes (thickness > consumption unslit > consumption slit) • 10mm > 1,120m per litre > 140m per litre • 20mm > 280m per litre > 70m per litre • 30mm > 175m per litre > 45m per litre • 40mm > 130m per litre > 35m per litre ArmaFlex Sheets • 3-4 m ² per litre	
Storage & shelf life		
12 months. Store as cool a	s possible but protected from frost. In the event of frost any gelification is reversible on warming	
Preparation of surfaces		
Compatibility with bases: • Very good adhesion to • The adhesive's compa	lex Ultima surface with Armaflex Cleaner. o metallic sufaces. atibility with colour coated sufaces needs to be tested. ahalt, bitumen and red lead (linseed oil-based)	
Woking time at 20 °C		
Wet adhesion time	Up to 2 minutes	
Drying time	3-5 mins	
Contact adhesion	15 - 20 mins	
Setting	36 hours	
The open time depends on t elapse.	he quantity as well as indoor climate conditions. Before operating plant the setting time needs to be allowed to	
Other technical features		
Flash point	approx -20 °C	
Expolsion limits	Lower: approx 1 Vol %, Upper: approx 13 Vol %	
Hazard class	Highly flammable, Regulation of inflammable liquids.	
Ageing stability	Very good	
Resistance to weathering	Very good	
Recycling	Allocation of a waste code number, according to the European Waste Catalouge, should be carried out in agreement with the regional waste disposal company. For details see relevant Safety Data Sheet. Packaging must be emptied of all residues. Packaging with traces of cured product can be recycled. Packaging with uncured product must be recycled into new product.

ArmaFlex RS850

NON-DRIP ADHESIVE FOR FASTER & CLEANER APPLICATIONS.

- Minimum solvent emissions when idle
- Ideal for hard to access areas
- Extended shelf-life
- Reduced solvent content to meet requirements for sustainable building projects
- Superior bonding with Armaflex
- Thixotropic gel based adhesive
- Low viscosity, air drying adhesive

Non-drip one component a	adhesive in gel form. Specifically developed for ArmaFlex insulation materials based on synthetic rubber.
Material type	Thixotropic contact adhesive on polychloroprene basis.
Colour	Beige
Material special info	Gel form
Applications	Application on pipes, ducts and tanks with service temperature up to +70°C. Gluing of all flexible ArmaFlex insulation materials (except HT/ArmaFlex & ArmaFlex Ultima).
Special features	Specially formulated adhesive for uniform and safe seam bonding of ArmaFlex insulation materials.
Assembly	Please observe our installation instructions/product data sheets. Application temperature: ideally +20°C, not below 0°C. At temperatures below +5°C or high humidity approx above 80%), increased condensation may form on the surfaces to be glued or adhesive films. In these cases bonding is poor or impossible. This can be tested by using absorbent paper (blotting or crepe paper). Work should not be carried out on operating plant or areas expossed to strong sunlight. Shake and stir well before use. Apply thinly to the areas to be bonded with a brush or spatula. For contact adhesion press together with force during the contact adhesion time. Detailed application guidance is avalable.
Remarks	The adhesive achieves its final strength after 24 hours. The system should never be operated during this time and any self-adhesive tape or protective coating (exception: ArmaFinish 99), should only be applied after the time has elapsed.

Temperature Range		
Max service temperature	+70°C	
Min service temperature	-40°C	
Performance		
Coverage (guidance only)	Minimum consumption with the adhesive applied to both surfaces: ArmaFlex tubes (thickness > consumption unslit > consumption slit) • 10mm > 1,120m per litre > 140m per litre • 20mm > 280m per litre > 70m per litre • 30mm > 175m per litre > 45m per litre • 40mm > 130m per litre > 35m per litre ArmaFlex Sheets • 3-4 m ² per litre	
Storage & shelf life		
	C in a dry place. Do not store with explosive substances or spontaneosly combusting substances. Store as cool rom frost. Cold or frozen adhesive (under 5°C) will become fully useable if slowly acclimatised up to working	
Preparation of surfaces		
	o metallic surfaces. atibility with colour coated surfaces needs to be tested. ahalt, bitumen, red lead (linseed oil-based), polystyrene and plasticated PVC	
Wet adhesion time	Up to 2 minutes	
Drying time	2 min	
Contact adhesion	10 - 15 mins	
Setting	24 hours	
	he quantity as well as indoor climate conditions. Before operating plant the setting time needs to be allowed to	
Other technical features		
Flash point	approx -17 °C	
Expolsion limits	Lower: approx 1.1 Vol %, Upper: approx 11.5 Vol %	
Hazard class	Highly flammable, Regulation of inflammable liquids.	
Ageing stability	Very good	
Resistance to weathering	Very good	
Recycling	Allocation of a waste code number, according to the European Waste Catalouge, should be carried out in agreement with the regional waste disposal company. For details see relevant Safety Data Sheet. Packaging must be emptied of all residues. Packaging with traces of cured product can be recycled. Packaging with uncured product must be recycled into new product.

ArmaFlex Cleaner

SURFACE CLEANER FOR ARMAFLEX INSTALLATIONS

- Ensures a clean surface before the use of ArmaFlex® Adhesives
- Removal of dirt from surfaces
- Cleaning of brushes and tools contaminated with ArmaFlex® adhesive

ARMAFLEX Cleaner Special cleaner for use with all ArmaFlex adhesives		
Colour	Clear	
Material special info	Liquid	
Applications	Cleaning of surfaces where ArmaFlex is to be installed.	
Assembly	To ensure a perfect adhesion all contaminated sufaces, including ArmaFlex, must be cleaned. In addition the cleaner can be used to sufaces where ArmaFinish 99 is being applied.	
Remarks	Can also be used to clean tools.	

Technical features		
Storage & shelf life	12 months sealed in original container. Keep container tightly closed in a cool, well ventilated place. Protect from heat & direct sunlight. Do not store together with explosive substances or spontaneously combusting subtances.	
Preparation of surfaces	 Clean surfaces and ArmaFlex surface with ArmaFlex Cleaner. Compatibility with bases: Very good adhesion to metallic sufaces. The adhesive's compatibility with colour coated sufaces needs to be tested. Incompatible with asphalt, bitumen and red lead (linseed oil-based) 	
Flash point	approx -20 °C	
Explosion limits	Lower: approx 1% Vol, Upper: approx 13 % Vol. Regulation of inflammable liquids.	
Recycling	Allocation of a waste code number, according to the European Waste Catalouge, should be carried out in agreement with the regional waste disposal company. For details see relevant Safety Data Sheet. Packaging must be emptied of all residues. Cans must be emptied prior to recycling. Cans containing adhesive must be recycled into new product.	
Transport classes	Dependent on the transport sector
