

KUBAN

COFFEE PROCESSING MASTER™

Our company, Kuban Makina, was established in 1996 by Ahmet Demirden in İzmir, Turkey. When our passion for coffee became irresistible, we decided to turn this love into a business and started to produce “coffee processing machines and equipment” for coffee-lovers all around the world.

We have expanded our product range since the beginning of our operations, and now, we serve both the domestic and international markets. Nearly 25 years of experience in the coffee industry has brought us mastery. Moreover, we constantly improve our products and services on the basis of customer satisfaction with our dynamic and disciplined team.

We pioneer this passion by using high-quality raw materials in all of our products that we produce. We stand out with our high-performance products, which are specially combined by our expert engineers. Our machines can be customized to customer demands.

KUBAN SUPREME-6

SUPREME-6

Innovation meets master roasting in one compact machine now! It has 6 kg green coffee beans capacity per batch. It has highest qualified heat insulation to obtain the exclusive roasting experience for users. Kuban Supreme will be the most favorite roasting machine among the coffee shops and coffee lovers all over the world.

COFFEE PROCESSING MASTER™

KUBAN SUPREME-6

CAPACIY	1-6 KG
ROASTING TIME	10-20 min.
ROASTING CAPACITY	18kg / hour
BURNER POWER	32,5 kW/ saat
GAS CONSUMPTION-LNG	3.38 m^3
GAS CONSUMPTION- LPG	2.34 m^3
WEIGHT WITH CYCLONE	450 kg
VOLTAJ	220V-380V
FREQUENCY	50-60 Hz
HEAT SOURCE	LPG- NATURAL GAS- DIESEL
HEATING SYSTEM	THERMAL TRANSFER
BURNER TYPE	ATMOSPHERIC OR PREMIX (NEW)
NUMBER OF MOTOR	4
POWER CONSUMPTION (KW/H)	1.85 kW/saat
CONTROL TYPE	MANUAL / SOFTWARE&PLC / FULL OTOMATION
CERTIFICATE	CE

COFFEE PROCESSING MASTER™

KUBAN SUPREME-6

TECHNICAL SPECIFICATION

- Proportional Flame Level: The flame level can be adjusted gradually and roast the same quality every time.
- Renovated Inside Blade Design of Drum: Increased the output speed roasted coffee with homogeneous heating.
- Homogeneous Heat Distribution with 55% Emptiness Drum Volume: Increasing conventional heating by minimizing contact of beans with the drum.
- Casting Front Cover of Drum: Overheating spot is prevented from front cover.
- Up to 70 RPM Adjustable Drum: It allows every type of roasting such as slow or aggressive roasting techniques.
- Increased Drum Insulation: It was ensured that the internal energy was protected by using heated air efficiently.
- Volumetric Airflow Control
- Low Noise Control
- Lower Operating Costs
- Premium Quality Components
- Removable and Rotatable Cooling Tray

SOFTWARE

Our new roasting software is specially built up for the **Kuban Supreme series** with advanced technology.

Kuban roasting software allows user to record, analyze, edit, save and create roast profiles, and display the relevant parameters such as roasting time, temperature, flame level, fan speed, etc.

It also saves the roast master's manual actions and stores any changes to the flame level in the PLC system using time and temperature codes.

It is offered with various PLC language options.
