

VENTILETION WINDOW COMFORTPROM

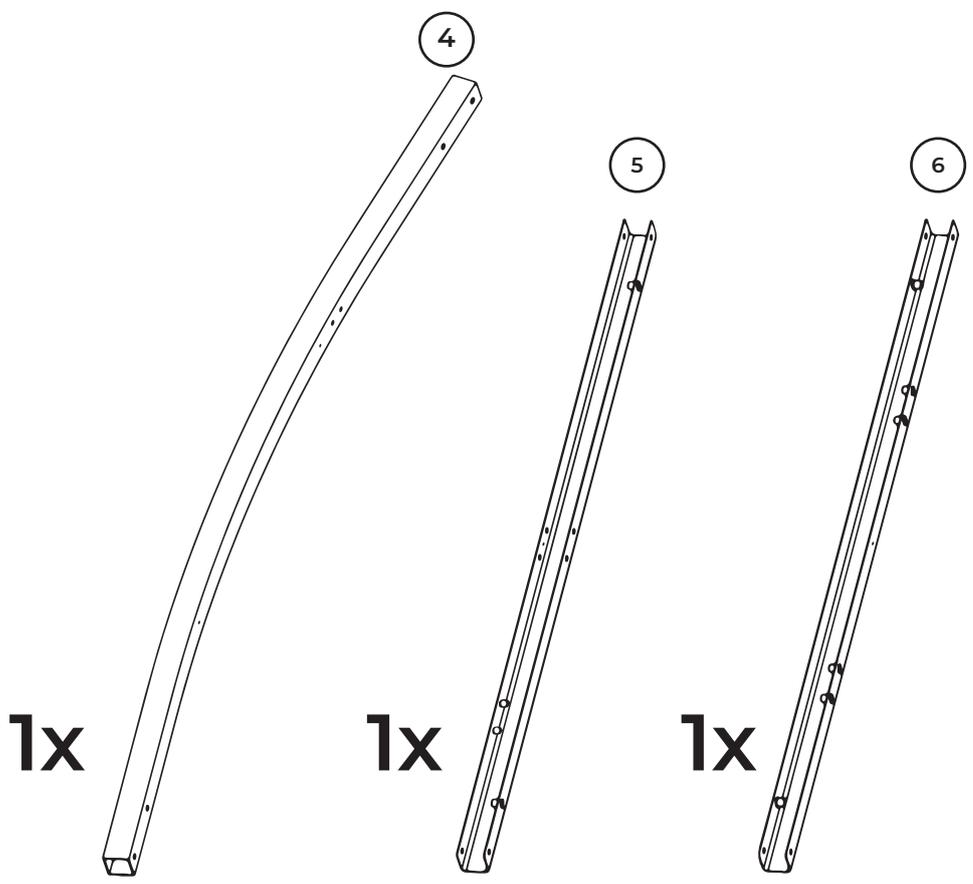

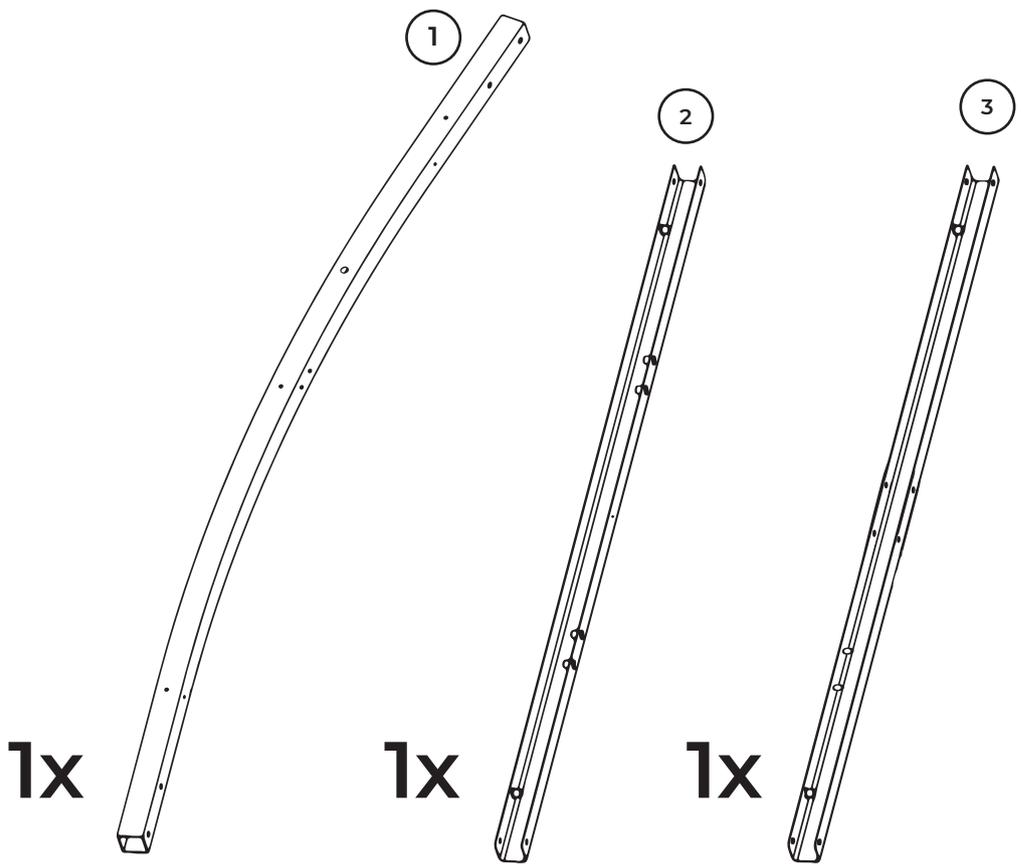

The vent for the greenhouse "ComfortProm" is designed to the Greenhouse ventilation and is installed in the roof of the greenhouse with self-tapping screws with a press washer and a rubber seal. Covered with cellular polycarbonate.

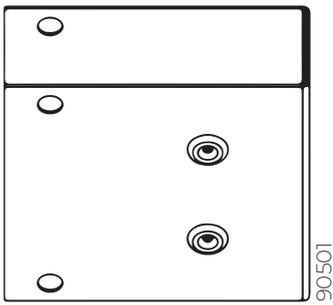

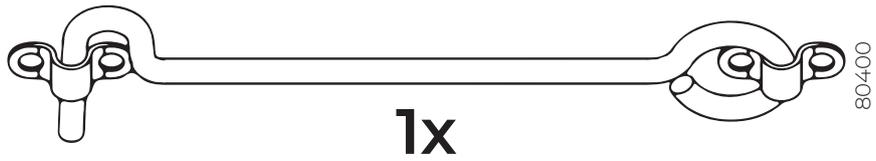

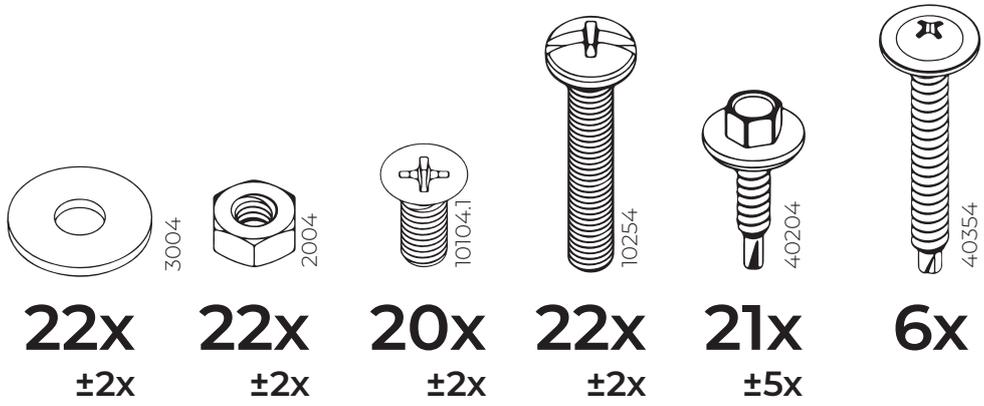

The vent is made of 20x20mm steel profile pipe. Includes a screw to fix the inside of the closed position, as well as self-tapping screws for mounting.

At the request of the customer on the window can be installed
automatic ventilation system.

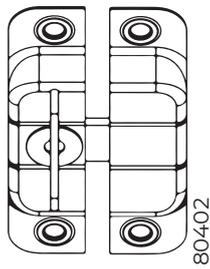

The company reserves the right to change the design in order to improve the consumer qualities of the product. Due to continuous improvement of product design and technological process there may be some minor differences between the datasheet and the product that do not reduce the consumer qualities of the product.
