

DS-2TE127-G4A Black Body

As a standard radiation source, black body has been widely used for calibrating infrared light system, measuring material emissivity, measuring parameters of infrared sensor, and transmitting temperature between infrared emitter and thermal device.

DS-2TE127-G4A is mainly used for the calibration of thermographic device. It helps to measure the temperature in high accuracy.

Key Feature

- Supports calibration of thermal device in high accuracy
- Supports different temperature settings
- High accuracy and good stability
- Easy temperature calibration and correction
- Strong ability of anti-interference
