

Най-популярните на пазара компактни влагозащитени плафониери ELLIS LED се предлагат с бял или черен цвят на корпуса. Белият цвят дава възможност за висококачествено осветление на закрити помещения с повишени нива на влажност и запрашеност, а черният – за по-универсално приложение на ELLIS LED IP54 в осветяването на фасади на жилищни, обществени, административни или търговски сгради.

The most popular on the market compact waterproof ceiling fixtures ELLIS LED are available in white or black body color. White color is suitable for high quality lighting indoors where higher demand for ingress protection is needed. Black color is for more universal application of ELLIS LED IP54 when lighting facades of various types of buildings.
