

EDBAK Proclean 1 FRTHV

Automatic hand sanitiser dispensers with a temperature sensor

Edbak products from the Proclean line make it easier to maintain safety and hygiene in public space. Proclean 1 FRTHV touchless and automatic hand sanitiser dispensers come with Hikvision DS-K1TA70MI-T body temperature screening terminals. The terminal automatically detects the face of the person who approaches the device, measures their body temperature, displays the result on the screen and reminds the user to wear a mask if they do not have any. These devices are reliably and effectively manufactured in three colours: white, light grey and dark grey.
