

SENA TUFFTALK

EARMUFF BLUETOOTH® COMMUNICATION & INTERCOM HEADSET

THE INDUSTRIAL IDEAL

SAFE AND EFFECTIVE INTERCOM COMMUNICATION

PROVIDING POWERFUL PROTECTION WITHOUT SACRIFICING AWARENESS

Sena Tufftalk's **24dB NRR (31dB SNR)** hearing protection offers safety from harmful noise, while the **ambient mode** feature allows users to amplify external sounds, generating a greater sense of awareness and surroundings so important alarms or calls can be heard while hearing remains protected. With the optional **hard hat mount** package, Tufftalk stands up to even the most rugged work environments.

The **Built-in Conference Intercom** offers seamless communication between 4 users up to 1.4km apart, while Sena's **Advanced Noise Control™** technology suppresses background noise to maintain clear conversations. Using **Bluetooth 4.1**, pair your Smartphone to make phone calls or wirelessly stream music through **HD quality audio** speakers.

For larger groups and/or longer distances, the included **2-way radio support** offers swift compatibility for various 2-way radio devices using Sena's **versatile 2-way radio cable accessories**. For added convenience, the **Sena Smartphone App** is available for download to easily set and adjust your Tufftalk preferences. Paired with Sena's patented glove-friendly and **easy-to-use jog dial wheel**, communication couldn't be easier!
