SANITIZE HARDWOOD OIL

Hygiene and Protection

Borma IG PURE is a latest generation SELF-SEALING FINISHING OIL FOR WOOD with a DUAL FUNCTION. Resulting from a focussed, innovative research and development project in our design laboratories, Borma IG PURE combines long-lasting eco-sustainable protection in synergy with self-regenerating cleaning in one, individual product.

SANITIZE HARDWOOD OIL

Plus:

- Provides top level protection to the wooden surface via a highly formulated, polymeric structure from renewable resources;
- Imparts Anti-Bacterial Properties;
- Delivers optimal, regenerative cleansing and sanitising action due to the latest Silver Ion Surface Release technology;
- Based on proven, accepted and consolidated safety of Silver Ions compared to other technologies;
- Borma iG PURE 'ready-to-use' technology based on natural oil;
- Transparent and light-stable finish'.

Interiors

- Ensure the product and the room temperature are not lower than + 10°C;

- Mix well before use and spread the product evenly with a brush, mohair roller, soft cotton cloth or by spray application. Do not over-apply;

- Allow to dry for 6-12 hours;

- Sand with 180-220 grit abrasive paper or Scotchbrite Pad and thoroughly remove dust before applying the second coat;

- Applying the second coat;

- Wait 24 hours for complete drying unless a third coat is preferred. If so repeat sanding process and reapply.
