

Suction and delivery ~ Heavy duty

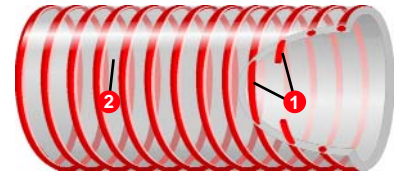

SPIRABEL® VENDANGES S.F.

+60
°C
-25

Spiral hose for wine producing applications with up to 50% alcohol content.

Shockproof rigid PVC spiral and flexible transparent PVC wall. Smooth exterior for diameters up to 63mm. Food quality.

- ① Red spiral in shockproof rigid PVC
- ② Flexible transparent PVC wall

Applications

- Wine growing
- Transfer of food liquids

Sectors of activity

- Wine producing
- Food processing

Advantages

With its excellent holding properties under pressure and during suction, the Spirabel Vendanges SF hose is extremely flexible, even at low temperatures, thanks to its specially formulated flexible PVC bore.

Its smooth interior minimises load loss, avoids retention areas and makes rinsing easy. Its outer layer is also smooth to make it easy to tighten the collars and reduce rubbing on the ground. The Spirabel Vendanges SF is perfect for

transferring food liquids and even conveying alcoholic beverages up to 50% alcohol content at 40°C.

Connectors

Guillemin or Storz symmetrical connectors, cam or universal joint connectors.

Fixings with band collars, single-thread or Nemo Spir collars (SERFLEX).

Chemical resistance

See table pages 47 to 51 column A.
